

1. Go to <https://developer.apple.com/>
2. Log in with the apple id you sent me.
3. Click on “Account” in the upper right hand corner.
3. You should see this ....

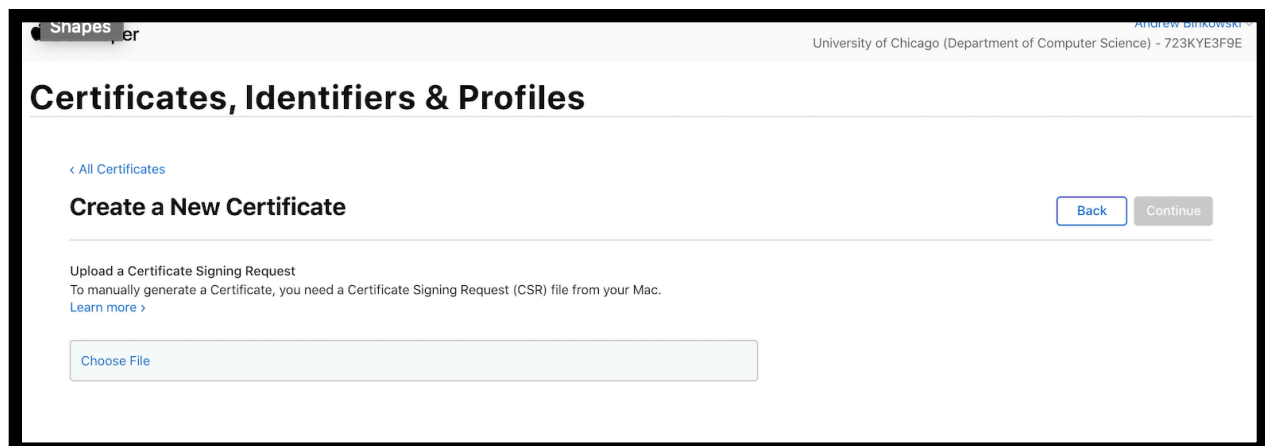

4. Click on “Certificates, Identities and Profiles” You should see this.

5. Click on the “+” . You should see this.

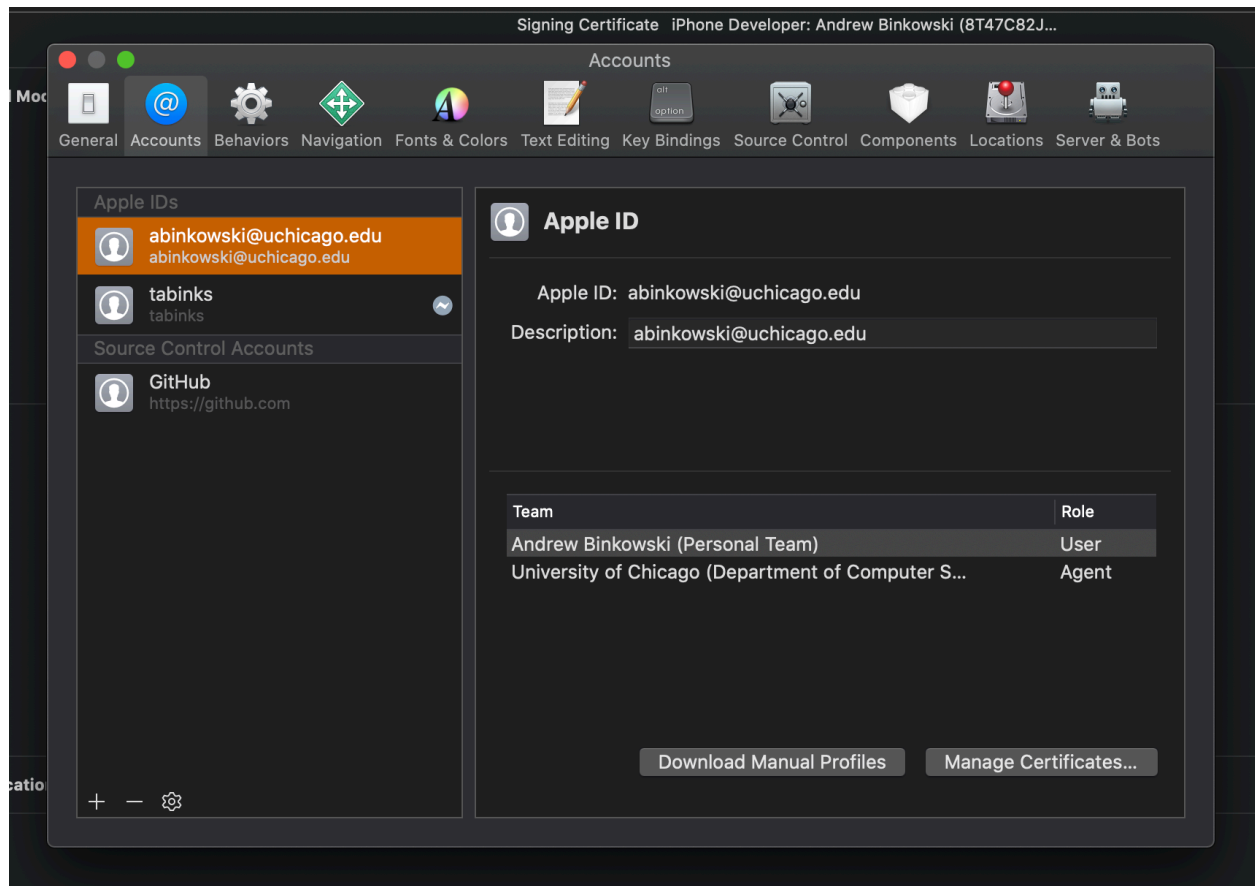

6. Click on iOS App Developer and hit “Continue”. You should see this...

7. Follow the directions in “Learn More”. You will create a file on your computer (following the “Create a certificate signing request” directions) to upload in the “Choose File” box.

8. You will download a certificate and drag and drop this on to the Xcode icon. Alternatively, you may add it in “Xcode > Preferences > Accounts” by clicking Manage Certificates.

9. Restart Xcode.
