PARENTAL GATE

PARENTAL GATE

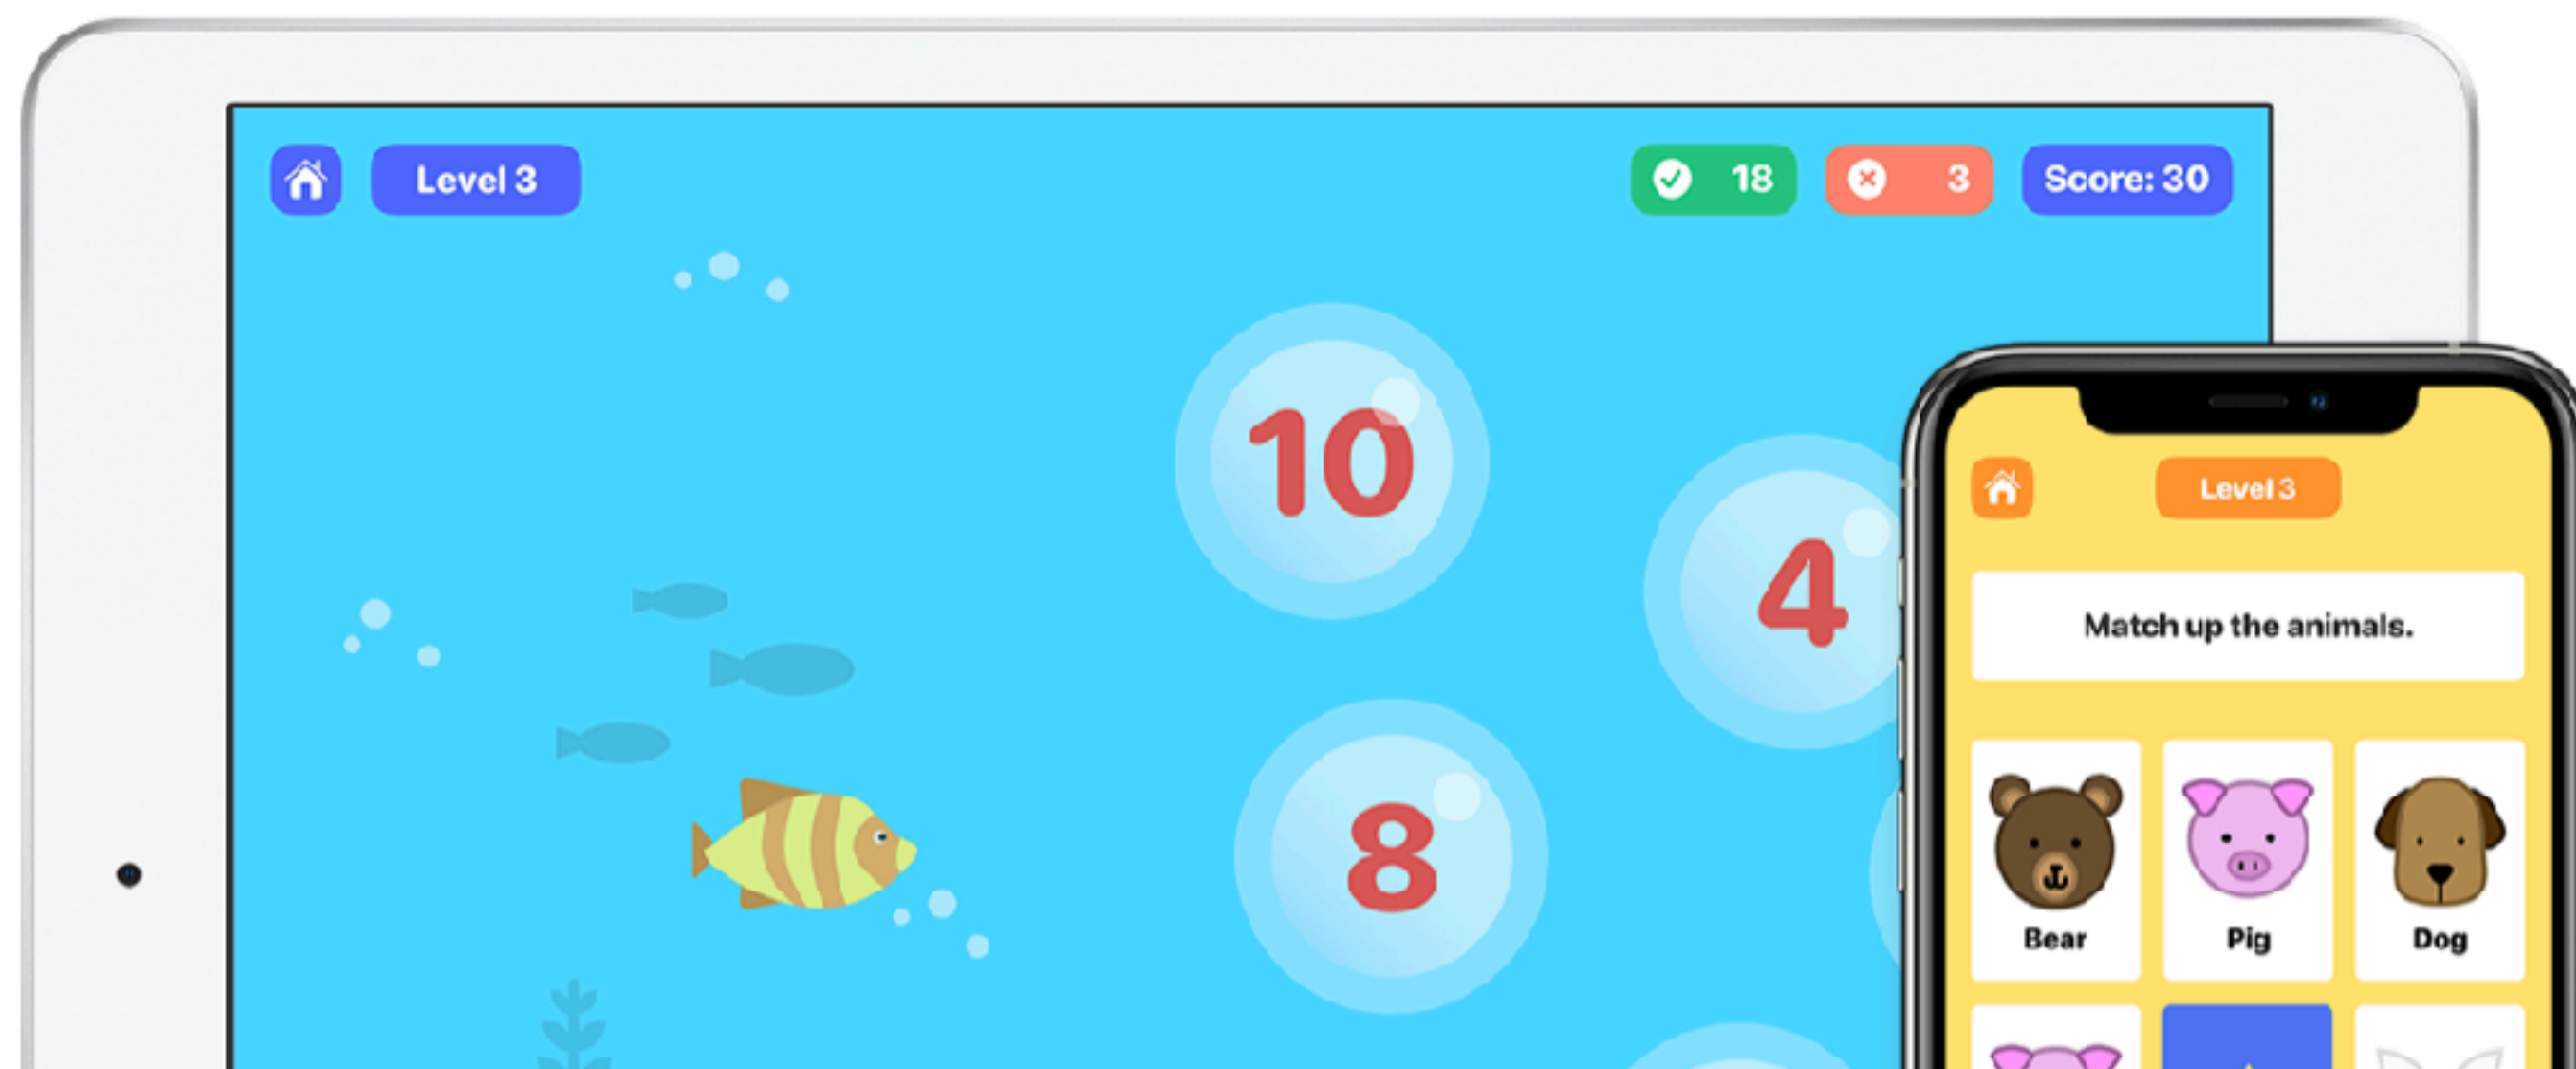

SUBTITLE

- Features are intended for parents, not kids
 - In-app purchase
 - Signup for news
 - Social Media
- Prevent kids from accessing inappropriate content

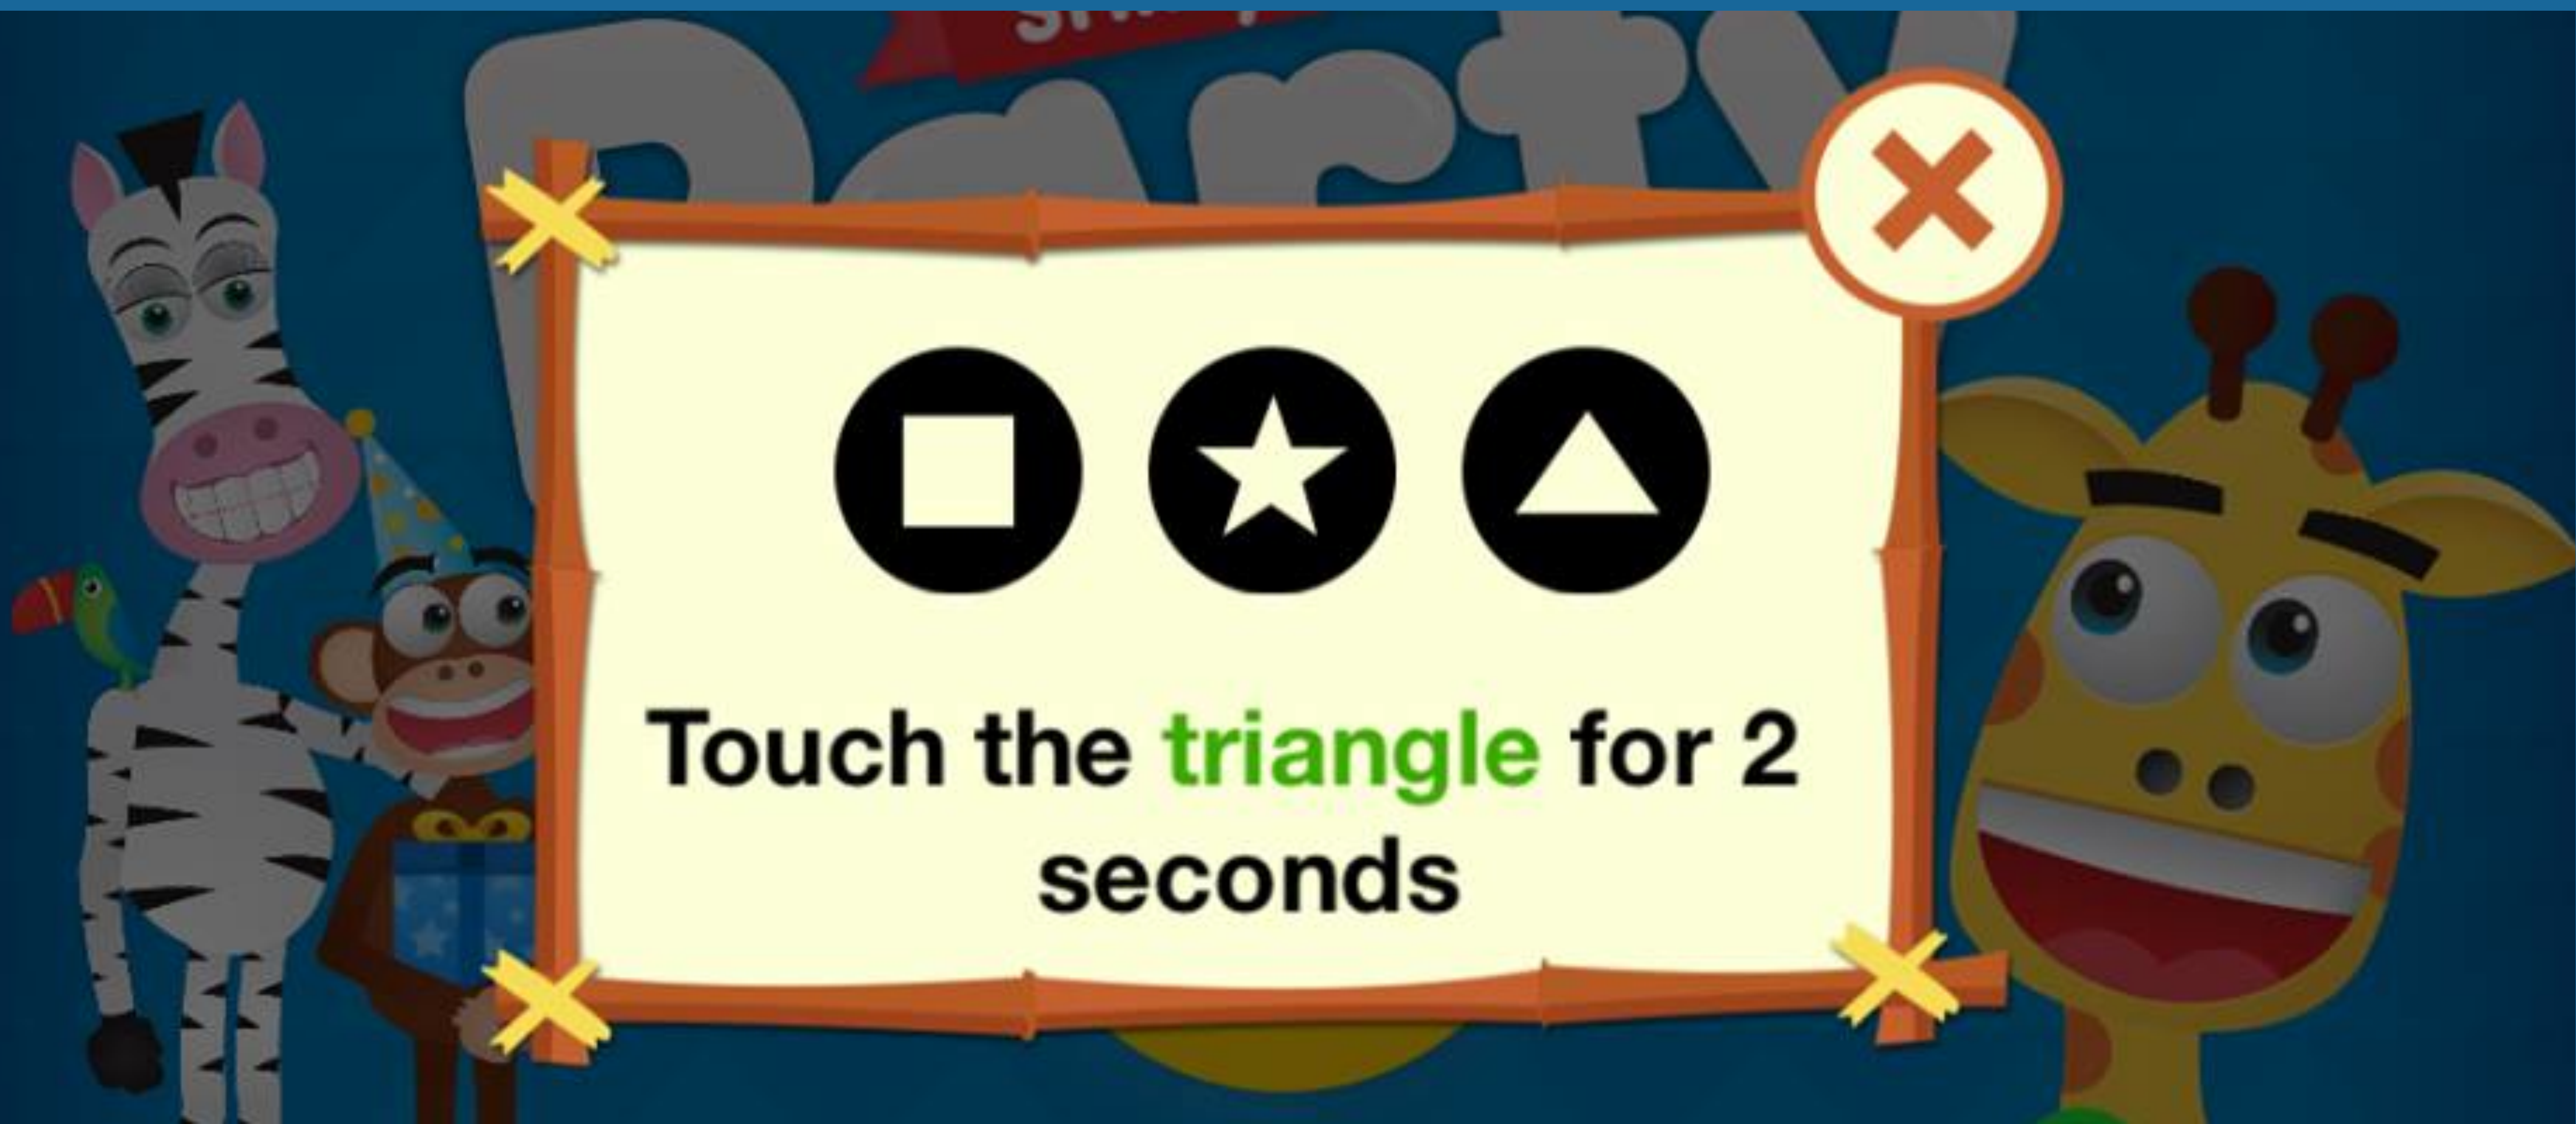

Building Apps for Kids

You can help kids learn, grow, and have fun with games, interactive stories, educational materials, and more. Find out how to create kids' apps that are safe and trusted by parents.

PARENTAL GATE

PARENTAL GATE

- Draw with a finger on the screen to validate
 - Circle
 - Check mark
 - Figure 8
 - ...

PARENTAL GATE

- Track and save touches
 - Began
 - Moved
 - End

```
override func touchesBegan(_ touches: Set<UITouch>, with event: UIEvent?) {  
    print("Began")  
    drawing = false  
    if let touch = touches.first {  
        lastPoint = touch.location(in: self.view)  
    }  
}
```

```
override func touchesMoved(_ touches: Set<UITouch>, with event: UIEvent?) {  
    print("Moved")  
  
    drawing = true  
    if let touch = touches.first {  
        let currentPoint = touch.location(in: view)  
        drawLineFrom(fromPoint: lastPoint, toPoint: currentPoint)  
  
        lastPoint = currentPoint  
        print(currentPoint)  
    }  
}
```

```
override func touchesEnded(_ touches: Set<UITouch>, with event: UIEvent?) {  
    print("Ended")  
    if !drawing {  
        drawLineFrom(fromPoint: lastPoint, toPoint: lastPoint)  
    }  
    tempImageView.image = nil  
}
```

PARENTAL GATE

- When touch point moves, connect the existing line segment to the new point

```
override func touchesBegan(_ touches: Set<UITouch>, with event: UIEvent?) {
    print("Began")
    drawing = false
    if let touch = touches.first {
        lastPoint = touch.location(in: self.view)
    }
}

override func touchesMoved(_ touches: Set<UITouch>, with event: UIEvent?) {
    print("Moved")

    drawing = true
    if let touch = touches.first {
        let currentPoint = touch.location(in: view)
        drawLineFrom(fromPoint: lastPoint, toPoint: currentPoint)

        lastPoint = currentPoint
        print(currentPoint)
    }
}

override func touchesEnded(_ touches: Set<UITouch>, with event: UIEvent?) {
    print("Ended")
    if !drawing {
        drawLineFrom(fromPoint: lastPoint, toPoint: lastPoint)
    }
    tempImageView.image = nil
}
```

PARENTAL GATE

- Draw small line segments with CG

```
/// Draw a line segment
func drawLineFrom(fromPoint: CGPoint, toPoint: CGPoint) {

    // Create the canvas
    UIGraphicsBeginImageContext(view.frame.size)
    let context = UIGraphicsGetCurrentContext()
    tempImageView.image?.draw(in: CGRect(x: 0, y: 0,
                                          width: view.frame.size.width,
                                          height: view.frame.size.height))

    // Create line segment
    context!.move(to: CGPoint(x: fromPoint.x, y: fromPoint.y))
    context!.addLine(to: CGPoint(x: toPoint.x, y: toPoint.y))

    // Set the `pen`
    context!.setLineCap(.round)
    context!.setLineWidth(brushWidth)
    context!.setStrokeColor(UIColor.black.cgColor)
    context!.setBlendMode(.normal)

    // Stroke the path with the pen
    context!.strokePath()

    // Copy the canvas on the imageview
    tempImageView.image = UIGraphicsGetImageFromCurrentImageContext()
    tempImageView.alpha = opacity
    UIGraphicsEndImageContext()
}
```

PARENTAL GATE

- Draw small line segments with CG

```
/// Draw a line segment
func drawLineFrom(fromPoint: CGPoint, toPoint: CGPoint) {

    // Create the canvas
    UIGraphicsBeginImageContext(view.frame.size)
    let context = UIGraphicsGetCurrentContext()
    tempImageView.image?.draw(in: CGRect(x: 0, y: 0,
                                          width: view.frame.size.width,
                                          height: view.frame.size.height))

    // Create line segment
    context!.move(to: CGPoint(x: fromPoint.x, y: fromPoint.y))
    context!.addLine(to: CGPoint(x: toPoint.x, y: toPoint.y))

    // Set the `pen`
    context!.setLineCap(.round)
    context!.setLineWidth(brushWidth)
    context!.setStrokeColor(UIColor.black.cgColor)
    context!.setBlendMode(.normal)

    // Stroke the path with the pen
    context!.strokePath()

    // Copy the canvas on the imageview
    tempImageView.image = UIGraphicsGetImageFromCurrentImageContext()
    tempImageView.alpha = opacity
    UIGraphicsEndImageContext()

}
```

PARENTAL GATE

- This implementation is limited
 - Single stroke
 - Raw point capture
- It collects all the points for you

PARENTAL GATE

Distance from point to center will be the same in a perfect circle

A hand drawn one should be close
